Rajoo Engineers commences expansion project at Rajkot unit

(29 Nov 2023, 11:22)

Back to news list

Rajoo Engineers has started construction and installation of 18,000 sq feet factory shed on recently acquired three industrial plots adjoining to the factory in Rajkot.

The decision to expand was catalyzed by Rajoo Engineers' strategic acquisition of an adjoining 2620.85 sq. meters of land in September 2023 and October 2023, enabling the company to further enhance its production infrastructure. The Bhumi Pujan ceremony, a traditional groundbreaking ritual, was conducted on 28 September 2023, marking the formal initiation of this ambitious expansion project.

The new factory shed is poised to become a cornerstone in Rajoo Engineers' quest for technological advancement and operational efficiency. It will house state-of-the-art machinery, fostering an environment conducive to research, development, and manufacturing of high-quality plastic extrusion solutions.
